INSTRUCTIONS FOR MOUNTING CATRIKE CLAMPS

With a Catrike, it's necessary to have mounting clamps. These come as part with the rack only when ordered with the "Catrike Mounting Hardware". Follow the above instruction until step 5, but you instead will fasten the mounting clamps to the ends of the struts (12) or (13). These clamps can be used to fasten the rack to various points on the Catrike. Below are some pictures of common setups.
